

ABSTRACT OF THE DISCLOSURE

A range of devices which are intended for the diet industry and which can be produced in different colors and from different materials, e.g. silver plated, chrome, brown, etc., using hi-tech alloys such as carbon fibre or plastics of high quality. The invention also relates to dishes comprising more than four rectangular spaces, for example six spaces and six internal weighing devices, as well as a space for a cutlery holder, salt, pepper and napkins. The inventive range includes a lunch box as an accessory for carrying the removable plastic structures containing the food.
